

Adjusting your account settings

Adjusting your account settings helps ensure everyone is working in a language and with units they understand. It also enables fine-tuning of elements like speeding tolerances according to your own company policy, ensuring the platform works the way you want it to.

From the dashboard click on the Account Settings icon at the top right of the screen.

This will take you to a new screen where you can adjust your settings.

The screenshot shows the 'Account settings' screen in the CameraMatics application. It has a dark blue sidebar on the left with navigation options. The main content area is titled 'Account settings' and contains three sections: 'Locale' with dropdowns for 'Language' (set to EN) and 'Units' (set to Imperial US); 'Speeding Bands' with a horizontal slider for 'Moderate Speeding - 6 MPH', 'Excessive Speeding - 11 MPH', and 'Severe Speeding - 15 MPH'; and 'System Health' with a button for 'System Health Report Setup'.

Within this screen, you can change the Language. The languages available are:

- English
- German
- Spanish
- Dutch
- French

You can also adjust the units of measurement to your liking. This can be either Imperial GB, Imperial US or Metric.

You can also adjust speeding bands.
Speeding bands are used to define speeding events as moderate, excessive or severe, in terms of how they are reported in the dashboard.
To adjust the thresholds simply drag the points.

Next, you will then need to determine how often the report is created: either daily or weekly.

Within the box at the bottom you can define who the report will be sent to. You can send to multiple people or just one.

If you select Recipients, you will then get a full list of anyone that the report can go to. These are all the external and internal contacts that you have. Simply select who you want to receive the report, and click submit.
