

What you see on the dashboard

When you log into your account, you will see a variety of 'widgets' that provide you with high-level information about your fleet.

Fleet Status

Fleet status summarises the current status of your vehicles. There are four different statuses:

- Driving (Green) – vehicles within your fleet that are being driven.
- Idling (Yellow) – vehicles within the fleet that are idling.
- Park Mode (Red) – vehicles are stationary and have had their ignition switched off within the past hour.
- Offline (Grey) – vehicles that are no longer active (the system stops recording an hour after ignition is turned off). You cannot pull any footage when your fleet is in this status.

IRE HEAD OFFICE

Unit 20A Beckett Way,
Parkwest Business Park,
Dublin 12,
Ireland. D12 P8R2
Tel: +353 (0)1 963 1380

System Health

System health shows any issues with the CameraMatics system installed in your fleet:

- Storage - This shows there are footage storage issues
- Video Loss – There are issues with the cameras installed
- Not Recording – System is not recording when active
- GPS – Location services are not working as expected.
- Offline 7+ Days – The device has been offline for at least a week.

Always make sure to rectify issues promptly to ensure you have the footage and data you need in the event of an accident, event or dispute.

Driving Events

The third widget shows statistics relating to driving events over the past two weeks. For each event we show the total number of events, and the change since the previous two week period. The events are categorised as:

- Vehicle Motion – Events such as harsh braking, steering and any collisions.
- Driver Monitoring – Driver events such as fatigue, phone usage and distractions.
- Speeding – All events relating to speeding

Map View

The final widget is a quick view of the map. This shows the current location of every vehicle in the fleet, and enables you to click any vehicle to open up further details and live streaming.
